

Kimmerle Newman Architects

Healthcare Programmer/Planner

This position is a key role within the KNA Healthcare Studio team.

The ideal candidate will have a strong background in healthcare architecture, with demonstrated capability in successfully carrying out programming and space planning to deliver results on mainframe hospital requirements and other complex healthcare projects. The Programmer/Planner will be expected to do the following:

- Take the lead on programming interviews to determine present and future institutional requirements
- Be able to speak authoritatively with institutional and/or departmental leadership and other medical practitioners
- Conduct full, detailed programming and planning for hospital departments, including operating rooms, emergency departments, patient floors, and other specialized requirements of a mainframe hospital setting
- Conceptualize at full hospital scale for planning and pricing purposes
- Develop a plan based on the program that can be taken to full design development by the Healthcare Studio team

This position may be primarily based at our Harding, NJ office, or at our office in Chelsea, Manhattan. Candidate will spend time between both offices and must be flexible for local travel.

Qualifications of Position

- Bachelor's degree in Architecture required; Master's strongly preferred
- 7+ years experience
- Licensure/registration a plus
- Documented experience in programming and planning for healthcare requirements (please provide listing of completed projects and institutions supported)
- Extensive working knowledge of AutoCAD; experience with Revit a plus
- Proficiency in MS Office Suite
- Strong oral and written communication skills, with strong presence in client-facing settings and proven leadership ability within a project team
- Ability to apply common sense to solve problems and make decisions in non-standard situations
- Working knowledge of commonly-used concepts, practices, and procedures
- Knowledge of federal, state and local codes, and healthcare laws and regulations
- Understanding of design, materials, and construction

About Kimmerle Newman Architects

The award-winning Kimmerle Group is comprised of six divisions, each with complementary specialties, including Kimmerle Newman Architects, Urban Studio, KG Real Estate Services, Workspace, Project Management and Branding. The multidisciplinary team, which was named the 2016 AIA NJ Architecture Firm of the Year, has established an outstanding reputation for its design and development work in corporate architecture and interiors, education, healthcare, urban design and planning, industrial and retail, private and multifamily housing and historic preservation.
