

COMMUNITY DESIGN WORKSHOP

AN AFFILIATE OF KIMMERLE GROUP

Kimmerle Group – Announces a Relaunch for the Community Design Workshop of Eastern Connecticut

CDW of Eastern CT welcomes you aboard! Fifty years of practice in the field of planning and design has proven to us that not-for-profits represent a special case. We recognize them as special because they need a helping hand in generating much needed community service offerings.

KG/KNA's outreach to the not-for-profit community along the north shore of Long Island Sound and southern Rhode Island, extending from New Haven to Newport, has been reborn. A post-pandemic relaunch, the center is focused at the needs of not-for-profits in our service area.

An affiliate of the NJ-based firm, provides pro bono services to help program, conceive and support not-for-profit causes and human service offerings throughout the region. A continuation of the firm's 35-year history of assistance to those in need, this KG-lead division is housed in a company owned facility in the seaside town of Stonington Borough, CT.

CDW's Water Street facility is a sophisticated conference meeting space with video and computer projection systems, lighting controls and a theater quality sound system, used for stakeholder programming and discussion sessions and pre-schematic design reviews.

The rear courtyard features a natural green wall and a wisteria covered trellis, where groups assemble for pre-and-post meeting gatherings, wine tastings and other exchanges. The CDW facility at Water Street also holds an IMDb film license and is used for topical film festivals, local writer events and script / book readings for local play writers and their cast members.

"Human services and community-based offerings are the exclusive targets of our work, servicing the need of not-for-profits in our service area."

"The larger goals of sustainable communities and development that embraces positive environmental and community building programs and efforts underscores CDW's commitment."

CDW is lead by the father and son team of George and William Kimmerle, AIA, NCARB

Three slots for CDW's pro bono offering in 2024 are now available. Apply below and tell us about yourselves.

Of note, 121 Water Street is actually a historic site, which local lore suggests is a remnant of the '38 New England hurricane carried across Little Narraganset Bay from Watch Hill, RI and deposited ultimately at this site in 1939. CDW's headquarters located in this seaside town, is highlighted with a frieze honoring the Greek God Poseidon, "the protector of seafarers and cities and lord over the sea, storms, earthquakes and horses."

Become a CDW candidate by reaching out with an overview description of your organization and its pending project profile.

CDW is focused on the needs of not-for-profit and faith-based organizations in the Southern tier of CT and RI - New London, Washington and Newport counties to be exact.

CDW is welcoming potential target organizations at this time - focused on the kickoff of these efforts.
